CUARTO MEDIO

El objetivo de esta guía es que los estudiantes identifiquen información sobre el reciclaje y la importancia en el cuidado del medio ambiente. Para dudas que tengan pueden escribirme un correo a esta dirección: yorka.sepulveda.pulmahue@gmail.com, escribiendo en el asunto el nombre de él o la estudiante y su curso, el horario para correos es de 9am a 4pm. Plazo de entrega: viernes 06 de noviembre hasta las 2pm

O.A: Identificar información relevante en textos sobre el reciclaje y cuidado del medio ambiente

READ THE FOLLOWING TEXTS ABOUT RECYCLING AND THE ENVIRONMENT PROTECTION.

Recycling is Important

Recycling is one of the best ways for you to have a positive impact on the world in which we live. Recycling is important to both the natural environment and us. We must act fast as the amount of waste we create is increasing all the time.

The amount of rubbish we create is constantly increasing because:

- Increasing wealth means that people are buying more products and ultimately creating more waste.
- Increasing population means that there are more people on the planet to create waste.
- New packaging and technological products are being developed, much of these products contain materials that are not biodegradable.
- New lifestyle changes, such as eating fast food, means that we create additional waste that is not biodegradable.

Environmental Importance

Recycling is very important as waste has a huge negative impact on the natural environment.

- Harmful chemicals and greenhouse gasses are released from rubbish in landfill sites. Recycling helps to reduce the pollution caused by waste.
- Habitat destruction and global warming are some the affects caused by deforestation. Recycling reduces the need for raw materials so that the rainforests can be preserved.
- Huge amounts of energy are used when making products from raw materials. Recycling requires much less energy and therefore helps to preserve natural resources.

Importance To People

Recycling is essential to cities around the world and to the people living in them.

- No space for waste. Our landfill sites are filling up fast, by 2010, almost all landfills in the UK will be full.
- Reduce financial expenditure in the economy. Making products from raw materials costs much more than if they were made from recycled products.
- Preserve natural resources for future generations. Recycling reduces the need for raw materials; it also uses less energy, therefore preserving natural resources for the future.

ANSWER THE QUESTION ABOUT THE TEXTS AND YOUR OPINION.

A) Do you care about the world's natural resources?

B) Why recycling is important?

C) Do you recycle or have your ever recycled?

D) According to the text, the amount of waste is increasing. Why is that? Give three examples.

E) What are the effects when we don't recycle?

F) What are the impacts of recycling?
